Dear Sir or Madam,

I am writing this letter to express my interest in joining the Futurice fullstack development team.

I have had background in programming ever since 2016, with my first language being the C Programming Language by K & R. Starting from that, and thanks to the Coronavirus, I have had the chance to seriously study and make my first steps in being a one of the best FullStack Developers you can find in Finland. As you can see from my portfolio, I am very well on my way to become a better developer. As I am trying to become a more fluent developer on Kubernetes, I hope you will give me a chance to grow more as a developer, such as skills in working with teammates, communicating with and helping other people to succeed!

I also have additional experiences with mobile app in React Native, with an app named "Repository Rating App" as part of the FullStack Open 2020 part 10.

So due to these details, I am confident that I will be a valuable, diversified part of the team and make Futurice becomes a better place.

Yours faithfully,

**Son To**
