Dear Sir or Madam,

I am writing this letter to express my interest in joining Barona Oy Fullstack Developer.

I have had background in programming ever since 2016, with my first language being the C Programming Language by K & R. Starting from that, and thanks to the Coronavirus, I have had the chance to seriously study and make my first steps in being a one of the best FullStack Developers you can find in Finland. As you can see from my portfolio, I am very well on my way to become a better developer.

Despite having a somewhat more modest backgrounds than the traditional developers, I have experiences in medium-sized web projects and have successfully made great apps without any kind of supports, and that speaks a strong potential of the future success of a talented web developer and of strong benefits to great employers who are willing to take a chance on me.

As I am trying to become a more fluent developer on Kubernetes, I hope you will give me a chance to grow more as a developer, such as skills in working with teammates, communicating with and helping other people to succeed!

Keywords: MERN, TypeScript, Docker, JavaScript, React-Native, Jest

So due to these details, I am confident that I will be a valuable, diversified part of the team and make Barona Oy becomes a better place.

Yours faithfully,

Son To
