Company Recruitment Team
Futurice
Helsinki

January 12, 2021

Dear Sir or Madam,

I am writing this letter to express my interest in joining the Futurice consulting company to become its software developer.

I have had background in programming ever since 2016, with my first language being the C Programming Language by K & R. Starting from that, and thanks to the Coronavirus, I have had the chance to seriously study and make my first steps in being a one of the best FullStack Developers you can find in Finland. As you can see from my portfolio, I am very well on my way to become a better developer. As I am trying to become a more fluent in DevOps side, I hope you will give me a chance to grow more as a developer, such as skills in working with teammates, communicating and helping other people to succeed!

Plus, Futurice has one of the nicest recruiters I have ever met. I am very confident that I can do more for the company.

So due to these details, I am confident that I will be a valuable, diversified part of the team and make Futurice becomes a better place.

Yours faithfully,

Son To
